I hold a Bachelor's degree in Informatics and am a passionate Mobile Developer and Frontend Engineer specializing in React Native, Flutter, and React.js. I thrive on building high-performance applications, optimizing UI/UX, and integrating innovative features. With experience in both team and independent projects,

Experience

PT Altitude Solutions

Jakarta, Indonesia

Technical Consultant

May 2024 – Present

- Acted as a Technical Consultant, collaborating with clients to identify business requirements and deliver tailored solutions in Microsoft Dynamics NAV/Business Central.
- Designed and developed new features, including creating reports, pages, and tables to meet client-specific needs, ensuring data visualization and print-ready outputs.
- Conducted system customizations, integrations, and performance optimizations to align with client workflows and enhance operational efficiency.

PT Alba Digital Teknologi

Tangerang Selatan, Indonesia

Mobile Developer (Intern)

Feb 2022 – Feb 2024

- Developed scalable and high-performance mobile app using React Native or Expo Go framework.
- Conducted code reviews, optimizations, and maintenance of codebase and features to ensure efficiency and reliability.

Projects

Sun Education - React Native: Developed an app for seamless study abroad services, including consultation, admissions, visas, and more.

Edu-Go - React Native: Built a SaaS platform for student recruitment, connecting institutions, agents, and students in a trusted marketplace.

Melandas - React Native: Designed and enhanced UI/UX for a boutique furniture app, adding features like Request File, Cart, and product UI.

Platinum Adi Sentosa - ReactJs: Implemented UI features for product editing, stock tracking, QR scanning, and delivery order management.

E-PPID Perhutani - Flutter: Developed a mobile app for real-time public information access, enhancing transparency and community engagement.

Personal Projects

MJ Salon Kasir - Flutter and Laravel: Created a POS system for salons with receipt printing, product management, and secure user roles.

Web Beli Tiket Bioskop - ReactJs and NodeJs: Built a scalable MERN app with TypeScript, Midtrans for payments, and modern UI/UX tools.
